**INTELLIGENT
CONTROL**

For Wires & Cables Trading LLC

Who We Are?

At Intelligent Control for Wires & Cables Trading L.L.C., we specialize in delivering cutting-edge solutions in intelligent building technologies, along with high-quality electrical cables, wires, and low-voltage control systems.

With a strong and growing presence across the United Arab Emirates, Qatar, Saudi Arabia, and Jordan, we cater to a broad spectrum of sectors including infrastructure, commercial, industrial, and residential developments throughout the Gulf and Levant regions.

OUR HISTORY

Founded on the principles of technical excellence, reliability, and customer-centric service, our company draws on over a decade of industry experience through our affiliated companies and strategic partnerships. We understand the evolving demands of modern electrical and smart building systems and are committed to providing tailored, standards-compliant solutions that add value to every project.

At Intelligent Control, our goal is to be a trusted partner to consultants, contractors, and developers by offering dependable products, expert technical support, and efficient supply chain solutions. Our regional network ensures prompt service, on-time deliveries, and localized support—empowering our clients to complete their projects with confidence and precision.

VISION

To be a leading regional provider of smart building technologies, electrical cables, and control solutions — recognized for quality, innovation, and trusted partnerships across the Middle East.

MISSION

To deliver reliable, high-performance electrical and low-voltage solutions that meet international standards, enhance building efficiency, and support the evolving needs of our clients. We are committed to excellence in service, competitive pricing, and long-term customer satisfaction through our regional presence and technical expertise.

VALUES

Integrity

We operate with honesty, transparency, and a strong commitment to ethical practices in all aspects of our business.

Quality

We ensure that every product and solution we offer meets or exceeds industry standards, delivering lasting value to our clients.

Innovation

We embrace emerging technologies to provide smart, future-ready solutions for modern building infrastructure.

Customer Focus

We build long-term relationships by actively listening to our clients' needs and delivering responsive, customized solutions.

Collaboration

We work closely with our clients, partners, and team members to achieve common goals and shared success.

Sustainability

We promote environmentally responsible practices and energy-efficient technologies to support a more sustainable future.

SERVICES AND PRODUCTS

Transportation

Building Management System (BMS)

BMS SIEMENS

Our BMS solutions provide centralized monitoring and intelligent control of HVAC, lighting, energy, and safety systems, enhancing efficiency and sustainability in modern buildings.

Lighting Control System

We deliver advanced lighting control solutions using KNX-based GAMMA systems that offer automation, scene settings, and energy savings across residential and commercial spaces.

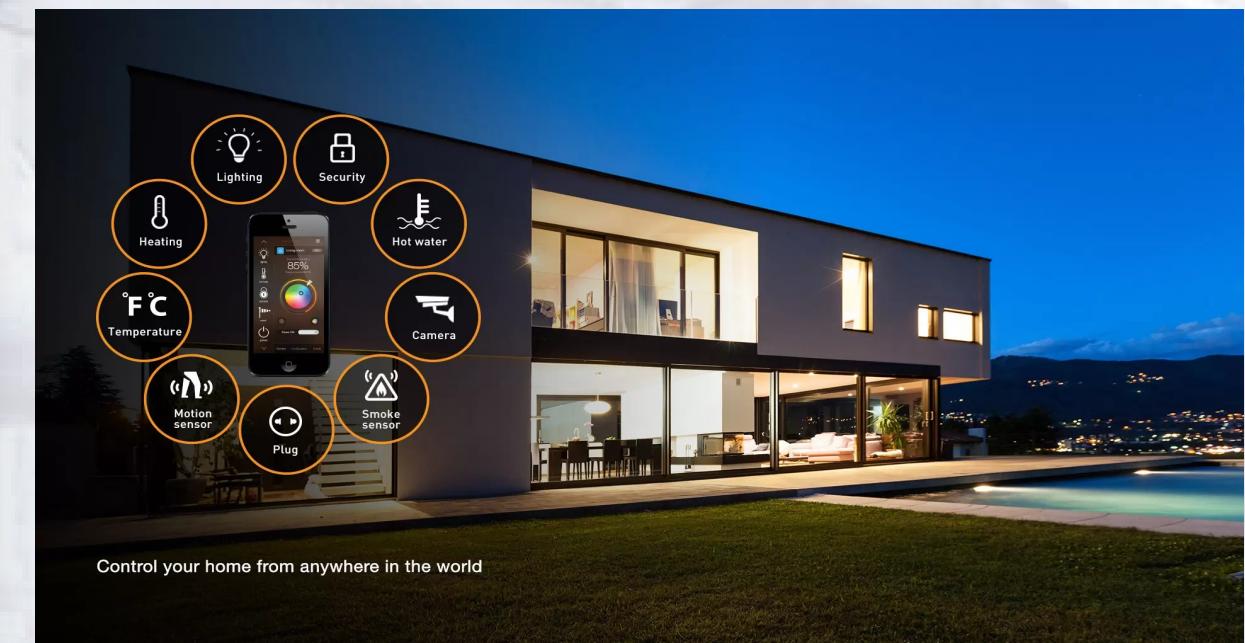

HVAC Valve Packages & Actuators

PICV valve packages ensure accurate flow control and system balancing in HVAC applications, improving energy efficiency, comfort, and long-term system reliability.

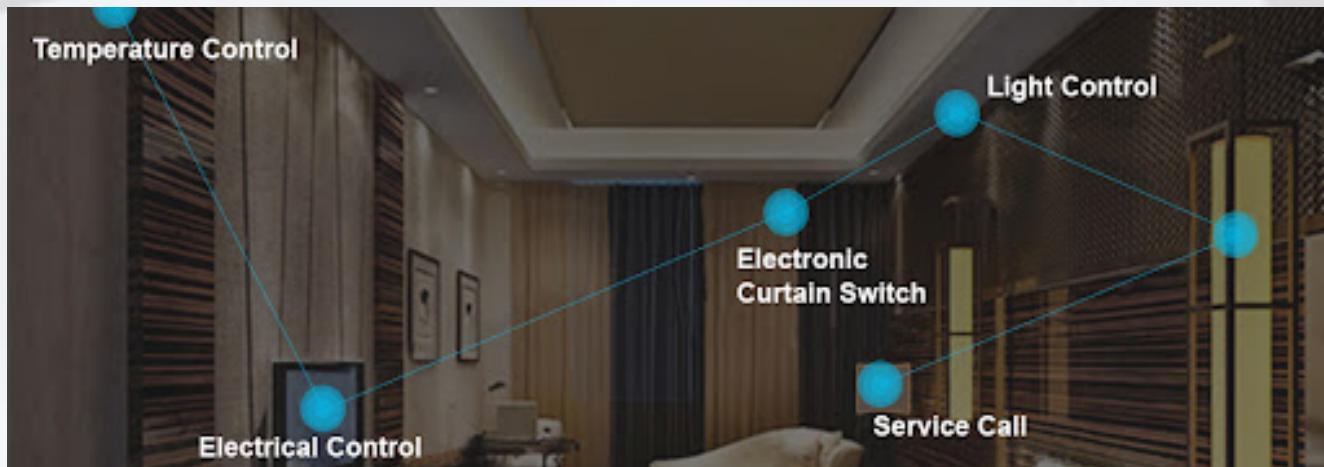

Smart Home Automation

Our smart home solutions integrate lighting, climate, security, and entertainment controls, offering comfort, safety, and remote access through a unified platform.

Guest Room Management System

GRMS provides personalized comfort, lighting, access control, and energy saving features for hotels and hospitality environments through intelligent automation.

Public Address and Audio Visual Systems

Our integrated PA and AV systems deliver high quality audio for announcements, background music, conferencing and presentations in commercial, educational, and public facilities.

Security and ELV Systems

We install high definition surveillance and access control systems that enhance building security and provide real-time monitoring with remote access capabilities.

Video intercom systems offer secure audio visual communication, visitor management, and access control for residential and commercial properties.

We design and implement structured cabling infrastructure that supports voice, data, and video transmission, ensuring scalable and high performance network connectivity.

ELV Cables & Wires

At Intelligent Control for Cables & Wires Trading L.L.C., we provide a comprehensive range of Extra Low Voltage (ELV) cables designed to meet the demands of modern intelligent building systems. Our portfolio includes high-performance solutions from renowned European manufacturers Belconn and Tecnikabel, ensuring reliability and compliance with international standards.

Belconn specializes in structured cabling solutions, offering a variety of ELV cables suitable for data, voice, and video transmission in commercial and industrial settings. They meet stringent international standards, ensuring optimal performance for applications such as structured cabling, CCTV, access control, and building automation systems.

Precision Connectivity
for Smart Infrastructure

Tecnikabel, a leading Italian manufacturer, offers a diverse range of ELV cables tailored for various applications:

Building Automation and Security Systems: Their cables are designed for integration into intelligent building technologies, including surveillance systems, access control, and fire alarm systems.

Industrial Automation: Tecnikabel provides cables suitable for motion control applications. These cables are ideal for use in machinery and equipment employing cable drag chains.

Quality and Compliance: Tecnikabel's products are developed with a focus on durability and performance, adhering to international standards to ensure reliability in various operational environments.

SIEMENS PARTNER CERTIFICATE

As an official Siemens Solution Partner, we stand at the forefront of building automation excellence, a testament to our expertise, innovation, and unwavering commitment to delivering world-class solutions. With Siemens' trust and certification, we possess the capability to supply, program, test, and commission every system we offer, ensuring unmatched efficiency, reliability, and seamless smart control for our clients. This partnership reinforces our dedication to setting new industry standards and shaping the future of intelligent automation.
